

# **EPIDEMIOLOGY OF INFECTIOUS DISEASES**

**Viktoriya Doycheva, Yordanka Mitova-Mineva, Svetla Angelova**

## *Abstract*

Epidemiology is a preventive medicine discipline. She studied the causes and spread of infectious diseases in the human population. In this article we consider the development of the Bulgarian epidemiology and contribution of Bulgarian scientists-epidemiologists for the rise of this science. They have dedicated their life and work to combat mass infectious diseases.
